

PS/RtI Technology & Learning Connections

The **Technology & Learning Connections (TLC) Team** supports increasing student achievement by the alignment of technology, policies, and curriculum through a multi-tiered universal education system. Our focus is students with disabilities and students who are struggling or considered at-risk. We support district/school staff, Local Assistive Technology Specialists (LATS), Regional Local Assistive Technology Specialists (RLATS), and FLDOE/BEESS Discretionary Projects.

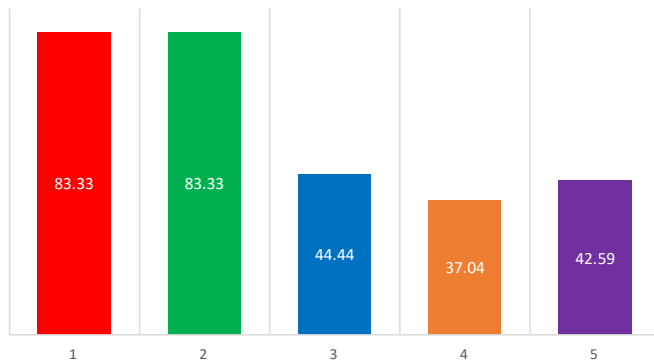

TLC Total Services 2022-2023	10,750
Student Services 2014-2023	70,404
ROI 2021-2023 (48%)	\$ 1,950,952
ROI 2014-2023	\$24,441,720

Instructional Student Outcome and PLC Data

2022-2023 Student AT & PLC Outcome Data

by Region 2017-2023

The **AT & UDL Loan Library** is an online service that is easily accessed. Library patrons are able at any time to access assistive technologies and resources and have them shipped at no cost to the patron or district.

One goal of an online system is to promote equitable service provision throughout Florida. The chart to the left illustrates service support in all Regions.

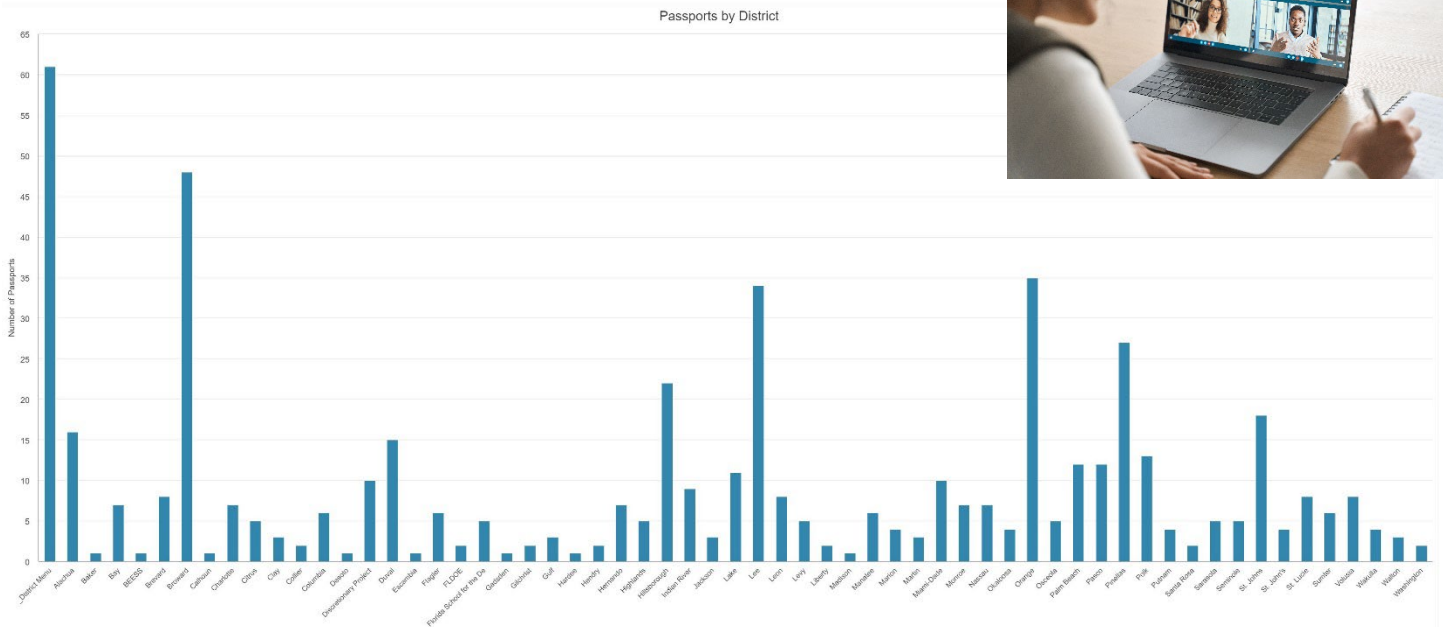

You can visit the Loan Library at www.at-udl.net.

Professional Development Support

TLC Professional Development Services are designed to provide district and school staff multiple pathways to professional development (PD) hours and certifications.

Passport to Learning is an online micro-credential professional development program developed by the TLC Team and the Assistive Technology Industry Association. Participants can earn PD hours and Continuing Education Credits (CEUs).

Educators and Therapists from across Florida's school districts have applied for and participated in Passport activities.

RESNA Cohort is a two-year program that prepares participants for an Assistive Technology Professional (ATP) certification from the Rehabilitation Engineering and Assistive Technology Society of North America.

Environmental Communication Teaching (ECT) “Train-the-Trainer” is a year-long, team-based program targeting strategies to support students with complex communication needs.

AT in the Classroom provides training on assistive technology and integrated instructional strategies.
