

## AIM Analysis Form

Select one of the student scenarios. Based on the information in the scenario, predict what areas of accessibility this student may need using the following areas. This prediction is to help guide the selection of assessment tools and strategies.

<p><b>Content</b></p> <p>Is the language appropriate and understandable?</p>	
<p><b>Structure</b></p> <p>Is the layout and amount of information appropriate?</p>	
<p><b>Presentation</b></p> <p>Is the sensory and physical aspect of the format appropriate?</p>	

Continue by predicting any accommodations that may be needed to ensure the following accessible.

<p><b>Instructional Environments</b></p> <p>Classrooms, science labs, media center, etc.</p>	
<p><b>Instructional Materials</b></p> <p>Print, digital, and web based materials and technologies (e.g. twitter, facebook, etc.).</p>	
<p><b>Instructional Assessments</b></p> <p>Print and online assessments.</p>
